VIRGOSOL

MobileHub

PHONE · TABLET · SMARTWATCH

Real-Device Mobile Testing & Automation

MobileHub is a cloud-based mobile testing product for running your manual and automated tests on real iOS and Android phones and tablets, smartwatches and emulators. You validate flows such as QR scanning, shaking and GPS location on real devices.

Key Features

01
Device Pool

- 150+ real iOS and Android devices, plus emulators
- Wear OS and watchOS smartwatch support
- Reservations of 15 minutes to 4 hours, up to a month ahead
- Connect your own devices to the pool
- Virgosol devices in the cloud, or your own devices in your own environment

02
Real Device Flows

- QR and camera flows
- Shake gestures sent on command
- GPS by map, coordinates or location
- Screen rotation
- Two devices side by side in one session
- Automated on-device WCAG 2.2 AA accessibility checks

03
Automation and Evidence

- Appium automation for Android (UiAutomator2) and iOS (XCUITest)
- Codeless tests with AutoRunner
- Ready-made sample code for Java, Python, Node.js and cURL
- Screenshots, video, logs, PDF reports
- Performance and traffic capture
- Defects linked to the test plan
- Jira and Azure DevOps integration

PROBLEM	HOW MOBILEHUB SOLVES IT
A limited number of physical test devices	Browser access to 150+ real devices and emulators
QR flows are tried by hand at a desk	The QR code is read by the device's own camera
Shake flows are left untested	The shake command is sent to a real device
Location testing requires field trips	GPS is simulated by map, coordinates or location
Evidence is scattered across folders	Evidence, defects and reports in one session
Manual testing and automation in separate tools	Both are managed in the same device pool

VIRGOSOL

MobileHub

What Teams Gain

QA teams

Also measure accessibility and performance in the same session.

Developers

Defects with video land in Jira; Appium tests are executed on real devices.

Product owners

Watch the defect on video and base release decisions on evidence.

Managers

See sessions, usage and automation rate in one report.

Who It's For

Companies with mobile apps

Releases that don't turn into bad reviews

Retail and e-commerce companies

Shake-to-win and code-scan campaigns

Banks, fintechs and logistics firms

QR payment, wallet and login flows

Companies without a device pool

Testing without buying or maintaining devices

Firms with distributed QA teams

Access to one device pool from anywhere

About Virgosol

Virgosol is an AI-native quality engineering company building trust in the age of AI, ensuring digital products run smoothly, securely and at scale. Under the motto "Engineering Confidence," it combines human expertise with AI to analyze, test and monitor digital products from requirements to production. Founded in 2019 and headquartered in Istanbul and Berlin, Virgosol serves more than 100 organizations in sectors such as banking, insurance, telecommunications, e-commerce and aviation, with more than 150 employees and 4 R&D locations.
